

Toronto is Canada's largest city with a diverse population of about 2.6 million people. It is Canada's economic engine and one of the greenest and most creative cities in North America. Toronto's government is dedicated to prosperity, opportunity and liveability. Join the award winning Toronto Public Service as a Transportation Engineer.

Transportation Engineer

File Reference #: X10CSB20482

Major Responsibilities:

As part of the Transportation Services Division's Infrastructure Management Section, and reporting to the Manager of the Infrastructure Planning Unit, the Transportation Engineer will have the following major responsibilities:

- Undertake engineering work in the Infrastructure Planning Unit, which is responsible for the functional planning of transportation facilities and Environmental Assessments for additions or modifications to the City's road network
- Prepare terms of reference for, select and direct engineering consultants to undertake work for the Division
- Prepare reports and correspondence for a variety of audiences
- Assist in the developing, planning, administering, monitoring and co-ordinating engineering activities, including the preparation and review of functional plans and technical reports and securing of environmental, planning and other approvals
- Liaise with and co-ordinate input from other Sections, Divisions, Departments and other stakeholders in the design, implementation, monitoring, evaluation and maintenance of transportation infrastructure, systems, policies and programs
- Represent the Transportation Division at meetings with Community Councils, standing committees, elected officials, staff of other sections, divisions, department and agencies, community and special interest groups, citizens and consultants
- Prepare and make presentations to senior Department staff, elected officials and the public
- Establish, maintain and foster linkages to other units throughout the City to ensure effective partnerships within the Corporation
- Maintains an awareness of developments and advancements in relevant fields to retain technical competency and to provide state-of-the-art advice

Key Qualifications:

1. Demonstrated experience in delivering complex transportation or engineering assignments with minimal direction while balancing stakeholder interests.
2. Demonstrated ability to effectively represent the Division, maintain relations and work with community and special interest groups, the general public, elected officials, internal and external clients and consultants.
3. Highly developed interpersonal skills with the ability to communicate both orally and in writing at all levels of the organization, with elected officials and the public
4. Knowledge of the Municipal Class Environmental Assessment.
5. Must be a qualified engineer as defined by the Professional Engineers of Ontario.

Salary: \$72,618.00 - \$90,071.80 annually
