If you seek a career with growth and challenge, where quality and accountability work in tandem with integrity and a responsiveness to change, we welcome you to learn more about us.

Traffic Engineering Analyst (Operations Technician 2)
Signal Design and Capital

Reporting to the Project Manager, this position is located at 101 Consumers Drive within the Signal Design and Capital Project Management Group of the Traffic Engineering and Operations Division.

The incumbent will:

- Generate detailed electrical and engineering designs for installation of traffic control devices and related infrastructure
- Assist in the development of tenders and quotes
- Perform site investigations for quality control, in response to technical questions and make recommendations for improvement
- Co-ordinate work with field staff, other divisions, area municipalities, utility companies, consultants and contractors in a diverse traffic engineering and operations environment
- Assist with the operation and maintenance of the Region's centralized traffic signal control systems by analyzing and developing signal timings, methods of control and traffic flow patterns
- Perform traffic engineering safety reviews by investigating and recommending improvements for existing operations at problematic or safety deficient intersections and roadway segments
- Plan and implement data collection programs to oversee the collection and maintenance of traffic data
- Maintain a computerized video and data library of Regional road assets and infrastructure using GPS/GIS
- Respond to enquiries from the public, internal groups and outside agencies

The successful applicant will possess:

- A post-secondary diploma in Civil Engineering Technology or equivalent
- Registration with or be eligible for registration as a Technologist with O.A.C.E.T.T.
- Several years of previous work related experience
- Proficiency in software applications such as AutoCAD, MS Office and specialized traffic and GIS software
- Knowledge of traffic signal installation, capital road and road safety improvement programs, Occupational Health and Safety Act and Regulations, Ontario Provincial Standards Specifications and Drawings, Ontario Traffic Manual, Ontario Highway Traffic Act, Regional and Municipal By-laws and policies
- Sound engineering judgement and problem solving skills
- Excellent written and verbal communication, organization, time management and interpersonal skills
- A valid Ontario class 'G' driver's license

I.M.S.A. Traffic Signal Certification would be an asset
